

BRINKS
GILSON
& LIONE
100 YEARS OF IP LAW

THE WAY FORWARD WITH
THE NANOTECHNOLOGY GROUP

→
**PROTECTING INNOVATION
IN A CHANGING WORLD**

A black ball is positioned on a light-colored wooden surface. A hole is visible in the wood to the left of the ball. Blue lines are drawn on the wood, one of which passes through the hole and around the ball. The scene is lit from the top, creating a shadow of the ball on the wood.

THE WAY FORWARD

means not letting obstacles impede your progress

The ever changing field of nanotechnology poses a wide range of important legal IP challenges that are cross-border and transnational in nature, which affect many businesses today, no matter the size. This may include the protection of commercial ownership rights, application of new technologies, raising R&D capital, preparing and prosecuting patent applications, as well as managing one's IP portfolio and assets.

With over 75 years of experience in obtaining intellectual property protection for innovations in a broad array of disciplines, Brinks Gilson & Lione attorneys understand the unique nature

of innovations in nanotechnology and are well qualified to help clients protect their inventions. Our practice is comprised of more than ten attorneys with PhD's in addition to the advisors who are chemists, chemical engineers, biochemists, and materials scientists.

It allows us to provide a multi-dimensional approach to delivering top-notch legal services.

450+

PATENT CASES
IN 10 YEARS

STRENGTH THROUGH SIMPLICITY

Our guiding principle in litigation is to keep it simple and efficient. The technology and legal principles may be

complex, but to succeed, trial themes need to be clear and persuasive and developed early in the case. Discovery needs to be strategic and purposeful. Our efficiency keeps litigation costs down for our clients while, at the same time, achieving success.

STEM

ADVANCED
DEGREES

LEADERS IN SCIENCE AND TECHNOLOGY

With numerous advanced degrees in the STEM areas, Brinks lawyers and patent

agents speak the language of innovation. Many have held private industry positions providing hands-on technology and engineering experience, along with a practical understanding of business issues. Our client-side perspective helps us anticipate obstacles, spot opportunities and develop strategies to increase portfolio value.

CITED

IN 350+ COURT
DECISIONS

TAILORED BRAND PROTECTION STRATEGIES

Several of the trademark group's members have authored prominent and

leading treatises relating to trademark law, including trademark litigation, international trademark practice, a corporate compliance treatise, a leading treatise on TTAB practice and the 10-volume leading treatise Gilson on Trademarks, cited in over 350 US court decisions.

AIA

POST-GRANT
PROCEEDINGS

CHALLENGE-RESISTANT PATENTS

With the advent of AIA post-grant proceedings, the protection of your patents must adapt to the new reality

of stronger patent challenges. Your patent's best protection from attack? Prepare for it early in the prosecution phase, well before the patent is issued. Our prosecution group works hand-in-hand with our litigation group to adapt, respond and prepare for challenges to come.
